# BIMI Certifications Emerges from Stealth to Introduce Verified Email for Financial Institutions

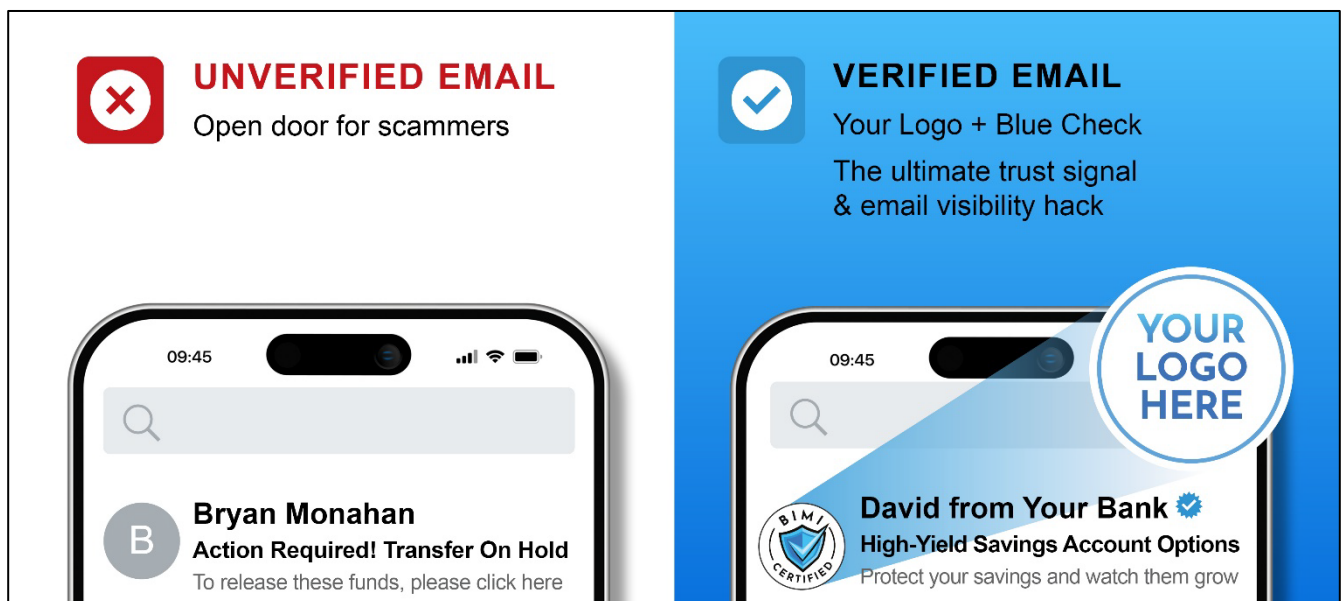

Delaware, MD – October 13, 2025

## Verified on X? Great. But what about your inbox?

At Money20/20 USA, BIMI Certifications officially emerges from stealth to lead a new era of verified email.

BIMI Certifications simplifies the process of obtaining and managing BIMI (Brand Indicators for Message Identification) compliance, allowing brands to display their verified logo directly in inboxes across Gmail, Yahoo, and Apple Mail.

***“Your emails shouldn’t look the same as phishing attempts,”*** said Chris Drvar, Founder and CEO of BIMI Certifications. ***“The powerful BIMI certificate instantly displays your brand’s logo and the blue verified check mark on all emails sent from your domain. That way we help companies prove who they are before the message is even opened.”***

Every year, email remains the #1 entry point for cyberattacks, with more than 90% of security breaches starting from a single message.

Yet despite massive investments in cybersecurity and branding, most companies still leave their email identities unverified.

## Verified Email: The 2-in-1 Solution for Fraud Prevention & Email Marketing Success

By partnering with BIMl Certifications, financial institutions can achieve visible trust, stronger protection against fraud, and higher engagement — all through the power of verified email.

***“BIMl is the lowest-effort, highest-impact upgrade a financial brand can make,” Drvar said. “In a world of complex compliance and security stacks, this is the one move that instantly makes trust visible to every customer.”***

But BIMl Certifications goes beyond verification. It includes a live 24/7 monitoring dashboard that continuously tracks domain health, detects spoofing attempts, and protects brand integrity in real time.

***“Our platform doesn’t just verify identity - it continuously protects it,” adds Drvar. “Imagine receiving real-time reports on who’s sending email on your behalf and when. With live monitoring and anti-spoofing intelligence, brands gain total visibility into their email ecosystem.”***

## What's Next?

BIMl Certifications is on a mission to accelerate BIMl adoption across the financial sector and lead the movement toward a future where every email is verified.

Attendees at Money20/20 Las Vegas can visit the BIMl Certifications booth **SU19** or scan the QR code below to run a free domain security check and learn how verified email can transform brand trust.

## About

*BIMl Certifications empowers businesses to make trust visible through verified email. The platform streamlines BIMl compliance so companies can show verified logos in inboxes worldwide — combining security, visibility, and marketing impact in one seamless solution.*
